CHOOSE A CAREER THAT HELPS SUPPORT INDIVIDUALS, FAMILIES AND COMMUNITY DEVELOPMENT

The Flexible Industry Pathway Program is a partnership approach delivering unique experiences for students within the community studies sector.

This course will include a range of theoretical and field based experiences providing students with an understanding of the diverse support offered to the Limestone Coast community. Skills and practical knowledge will be gained to assist with supporting children, the elderly and people with disabilities.

The skills training will be designed to meet health and community service industry needs and developed within SACE subjects that earn SACE credits, setting students up for post-school success.

The Health and Health Services course will increase employment options within the community services industry and provide pathways to further studies in:

- Community services
- Aged care
- Disability work
- Health Service Assistance
- Allied Health
- Nursing

You could also find employment delivering services to a variety of employment programs that benefit the local community.

The health services sector is one of the largest, diverse employing industries within the Limestone Coast region. The Flexible Learning Pathway program will focus on emerging skills and careers.
